WHY KNIT WITH TWO YARNS TOGETHER?

A few years ago I have started a throw knitted with scrap yarns. To make sure I have a tension as regular as possible, I've chosen a 6mm needle and knit two or even three strain of yarn at the same time and I fell in love with the result. Not only you can take advantage of the nature of different type of fibers, but it gives that hatred look that I love so much. Be creative and use this technique with anything! So many possibilities!
